## **DETAILED ACTION**

### ***Summary***

1. This Office Action is based on the Response and Amendment filed with the Office on April 29, 2011, regarding the HENRY et al. application.
2. Claims 1, 3-38, 43-45, 53, 54, 65, 66, 70, 73, 74, 76-80, and 85-87 are currently pending and have been fully considered.
3. The previous restriction based on the lack of unity that was mailed on October 21, 2009, has been withdrawn by the Examiner, as no lack of unity further exists between the elected group of claims and the previously non-elected and withdrawn claims. Claims 1 and 3-36 are rejoined and have been searched and considered.

### ***Allowable Subject Matter***

4. Claims 1, 3-38, 43-45, 53, 54, 65, 66, 70, 73, 74, 76-80, and 85-87 are allowed.
5. The following is an examiner's statement of reasons for allowance: As now amended, the independent claims, 1, 18, and 37, recite a microchip with two layers, at least one said layer being formed absent a conductive element, separation channel, and detection channel. This limitation is not taught nor

Art Unit: 1759

rendered obvious to one of ordinary skill in the art by the prior art. The closest prior art reference has previously been made of record, MARTIN et al. MARTIN teaches a two layered microchip system, however, neither layer is absent all of the elements which is recited by the instant independent claims and the device and method taught by MARTIN would not operate in the manner in which is was intended if modified to have a layer absent of all the elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
